The special features of the final project are background music, type-writer texts, and the animations. Since the purpose of the project is to visualize the user going on a mission, the typewriter effect helps to introduce the vibe and scenario perfectly, along with the background gif I drew and the check list.

The background music that plays also helps to engage and immerse the user into each of the background pictures I've painted/animated. It creates anticipation as the user navigates through the website. They also play immediately when the user lands on the index.html page.

The animations themselves are painted to create more impact and amusement for the overall idea!
